# TIMETABLE

## 12:00-13:20 Essentials of oncology

- Introduction
- The basics of cancer biology
- The essentials of systemic therapy
- The essentials of radiation therapy
- The essentials of surgery
- · The essentials of interventional oncology
- · Multidisciplinary team meetings
- O&A/Discussion

### 13:20-14:25 Lung cancer and lung metastases

- Pathology and approach to sampling in lung tumours
- Surgery for lung tumours: techniques and indications
- Radiation therapy for lung tumours: techniques and indications
- Systemic therapy for lung tumours
- An outline of IO therapies and their roles in lung tumours
- O&A/Discussion

#### 14:25-15:00 Break

#### 15:00-16:05 Primary liver cancer and liver metastases

- Pathology and approach to sampling in liver tumours
- Surgery for liver tumours: techniques and indications
- · Radiation therapy for liver tumours: techniques and indications
- · Systemic therapy for liver tumours
- An outline of IO treatments and their roles in liver tumours
- O&A/Discussion

### 16:05-17:10 Renal cell carcinoma

- Pathological subtypes of renal masses
- Surgery for renal cell carcinoma: techniques and indications
- Radiation therapy for renal cell carcinoma: techniques and indications
- · Systemic therapy for renal cell carcinoma
- · An outline of IO treatments and their roles in renal cell carcinoma
- Q&A/Discussion

#### 17:10-17:50 Clinical practice in IO

- Consultations and follow-up
- Multidisciplinary: what does it mean?
- Tips for working with cancer patients
- Q&A/Discussion
